The number of acres of fruit, vegetables and other specialty crops covered by crop insurance increased from 7.7 million acres in 2009 to about 9 million acres in 2017. That’s an increase of 8 percent in just 8 years.

- Many specialty crops are insured at rates similar to row crops such as corn, soybeans, wheat and cotton. For example, 76% of apple and almond acres are insured, as well as 81% of cranberries.*
